OUTDOOR PRODUCT CARE

If cushions get wet, tip them on their sides with the zipper facing down and unzipped to ensure that all water drains. Although our outdoor upholstery fabrics are mildew resistant, spores that create mold and mildew thrive in environments with dirt and moisture. To deter mold and mildew, always remove wet cushions from furniture frames and perform frequent cleaning and maintenance.

CLEANING AND MAINTENANCE

- Brush off any dirt or debris with a soft bristle brush or spray off with a hose.
- Dry with a soft cloth.
- Mix warm water with a mild soap, and clean with a soft bristle brush.
- Do not use abrasive cleansers.
- Rinse with water and dry with a soft cloth.
- Furniture should be cleaned periodically and always before storing.
- If furniture is in a saltwater environment, rinse weekly to remove all salt.

Cushions should be removed whenever possible before covering the frames for longer than a few days to avoid mold and mildew build up.

All covers are removable and washable, however, dry cleaning is recommended for all fabrics.
